

SECURING BUSINESS AROUND THE WORLD

secure access control

Need better integration into your access system?
 Want your biometrics integrated, not just added on?
Secure access control from TSSI - the right choice!

enGuardPro

Gone are the days of large proprietary databases and expensive access cards. Today, your access control system must have connectivity, interoperability and flexibility.

enGuardPro - the latest in fully scalable access control solutions from TSSI. With enhanced connectivity and options like ID card production or fully integrated biometrics.

Fingerprint biometrics is a core part of the system - not an expensive afterthought that requires extra wiring. enGuardPro supports a wide range of readers and allows you to easily share data between systems.

Supported by our Helpdesk and regular installer training days, TSSI - the manufacturer - will help you and your customers overcome integration, installation and training issues.

access control systems

enGuardPro access control offers integrated biometric capability.

It's ease of installation and simple user interface makes it an obvious choice for both installers and end-users.

This widely used and proven product now integrates with most personnel and payroll software to eliminate the need for duplicating data entry.

How our customers use enGuardPro

- **Airports** - air side access
- **Commercial** - access control
- **Defence** - visitor and access passes
- **MoD** - access control passes
- **Retail** - in-store security passes

.... and some of the card types they use

- Proximity
- Magnetic stripe
- RFID
- Mifare
- iCLASS

The flexible licensing options provide scalability ranging from a simple four door, enGuard "Lite" solution, to a fully configured system that incorporates ID card production and biometric template management. The cost-effective biometric option allows sites to be genuinely upgraded to biometrics without expensive additional wiring.

With a powerful SQL database providing the scalability, the system will interface with other software (payroll, personnel etc.).

enGuardPro is supported by TSSI's Helpdesk and Product support team. Our engineers and product consultants are ready to advise and help with your requirements.

Features of enGuardPro

- Integrated biometric option
- Fully scalable SQL database
- Integrated badge designer
- CCTV interfaces
- Event triggers and alarms
- Interface to other applications
- Mifare and iCLASS encoding
- Magnetic stripe encoding
- Variable access rights
